

DAYS 98-115 / MASTER INDEX

Foundation Collection Learning Index

A guided map of 18 machine-learning notes covering revision, supervised learning, evaluation, clustering, and dimensionality reduction.

LEARNING GROUPS

RECOMMENDED PATH**1****Mathematical and ML foundations**

Days 98-104: revision, ML fundamentals, data splits, model fit, features, and regression.

2**Supervised learning and evaluation**

Days 105-111: revision, classification algorithms, tree models, and evaluation metrics.

3**Revision and unsupervised learning**

Days 112-115: supervised-ML revision, clustering, PCA, and association learning.

REVISION RHYTHM

Revision notes appear on Days 98, 105, and 112.

GROUP 01 / DAYS 98-104

Mathematical and ML foundations

Review the mathematical foundation, then move through core machine-learning concepts and linear regression.

DAY 98	Weekly Revision — Statistics, Probability and Calculus TOPIC Revision of Days 92–97: Statistics, Probability and Calculus PDF Day-98-Weekly-Revision.pdf	15 PAGES
DAY 99	Machine Learning Fundamentals TOPIC Machine Learning, Features, Labels, and Workflow PDF Day-99-What-Is-Machine-Learning.pdf	10 PAGES
DAY 100	Training, Validation and Test Data TOPIC Training, Validation, and Test Datasets PDF Day-100-Training-Validation-and-Test-Data.pdf	11 PAGES
DAY 101	Overfitting and Underfitting TOPIC Underfitting, Overfitting, and Generalization PDF Day-101-Overfitting-and-Underfitting.pdf	10 PAGES
DAY 102	Bias–Variance Tradeoff — Beginner Introduction TOPIC Bias and Variance PDF Day-102-Bias-Variance-Tradeoff.pdf	9 PAGES
DAY 103	Feature Engineering Basics TOPIC Creating Useful Features PDF Day-103-Feature-Engineering-Basics.pdf	11 PAGES
DAY 104	Linear Regression TOPIC Supervised Learning and Linear Regression PDF Day-104-Linear-Regression.pdf	10 PAGES

GROUP 02 / DAYS 105-111

Supervised learning and evaluation

Connect supervised-learning algorithms with classification and regression evaluation methods.

DAY 105	Weekly Revision — Machine Learning Foundations TOPIC Revision of Days 99–104: Machine Learning Foundations PDF Day-105-Weekly-Revision.pdf	12 PAGES
DAY 106	Logistic Regression TOPIC Binary Classification with Logistic Regression PDF Day-106-Logistic-Regression.pdf	11 PAGES
DAY 107	K-Nearest Neighbors (KNN) TOPIC K-Nearest Neighbors Classification PDF Day-107-K-Nearest-Neighbors.pdf	12 PAGES
DAY 108	Naive Bayes — Beginner Introduction TOPIC Probability-Based Classification with Naive Bayes PDF Day-108-Naive-Bayes.pdf	12 PAGES
DAY 109	Decision Trees and Random Forest Basics TOPIC Decision Tree and Random Forest PDF Day-109-Decision-Tree-and-Random-Forest.pdf	14 PAGES
DAY 110	Classification Model Evaluation TOPIC Confusion Matrix, Accuracy, Precision, Recall, and F1 Score PDF Day-110-Classification-Evaluation-Metrics.pdf	15 PAGES
DAY 111	Regression Evaluation and Cross-Validation Basics TOPIC MAE, MSE, RMSE, and Cross-Validation PDF Day-111-Regression-Metrics-and-Cross-Validation.pdf	15 PAGES

GROUP 03 / DAYS 112-115

Revision and unsupervised learning

Consolidate supervised learning, then explore clustering, dimensionality reduction, and associations.

DAY 112	Weekly Revision — Supervised ML and Evaluation TOPIC Revision of Days 106–111: Supervised Machine Learning and Evaluation PDF Day-112-Weekly-Revision.pdf	16 PAGES
DAY 113	Clustering and K-Means TOPIC Unsupervised Learning and K-Means Clustering PDF Day-113-Clustering-and-K-Means.pdf	12 PAGES
DAY 114	DBSCAN Clustering — Beginner Introduction TOPIC Density-Based Clustering with DBSCAN PDF Day-114-DBSCAN.pdf	15 PAGES
DAY 115	PCA and Association Learning — Beginner Concepts TOPIC Dimensionality Reduction and Association Learning PDF Day-115-PCA-and-Association-Learning.pdf	16 PAGES

COLLECTION SUMMARY

18 note PDFs | Days 98-115 | 226 note pages

QUICK LOCATOR

Find the right note fast

Use this map when you know the machine-learning concept you want to review.

Want to review...	Core concepts	Go to
Statistics, probability, and calculus	Foundational revision	Day 98
Machine learning fundamentals	Supervised and unsupervised learning	Days 99, 105
Training, validation, and test data	Dataset roles and splitting	Day 100
Overfitting, underfitting, bias-variance	Generalization and model behavior	Days 101-102
Feature engineering and linear regression	Features and continuous prediction	Days 103-104
Logistic regression, KNN, Naive Bayes	Classification algorithms	Days 106-108
Decision trees and random forest	Tree-based classification	Day 109
Classification model evaluation	Accuracy, precision, recall, F1	Days 110, 112
Regression evaluation and cross-validation	MAE, MSE, RMSE, folds	Days 111-112
Clustering, K-Means, and DBSCAN	Unsupervised grouping and noise	Days 113-114
PCA and association learning	Dimensions and association rules	Day 115

COLLECTION SUMMARY

18 source notes | 18 note PDFs | 226 note PDF pages

Source inventory: 0 Mermaid blocks and 0 LaTeX math expressions; all note pages use A4 portrait.

Collection: Days 98-115 | Updated 27 September 2026
