

DAY 116-126 / MASTER INDEX

Foundation Collection Learning Index

A guided map of 15 notes covering reinforcement learning, machine-learning workflows, MLflow, FastAPI, HTTP, REST, Postman, and API testing.

LEARNING SECTIONS

RECOMMENDED PATH**1****Reinforcement learning**

Start with Day 116, then move into the Day 117 workflow.

2**Machine-learning workflow and MLflow**

Use the four Day 117 notes and revise on Day 119.

3**FastAPI and project work**

Connect Day 118 to the two Day 120 project notes.

4**HTTP and API testing**

Complete Days 121-126 in order.

COLLECTION RHYTHM

Move from ML concepts and workflows into deployment, HTTP, and API testing; use Days 119 and 126 for consolidation.

SECTION 01 / DAYS 116-119

ML foundations, workflow, and FastAPI

Move from reinforcement learning into practical ML workflows, MLflow tracking, FastAPI, and weekly revision.

DAY 116	Reinforcement Learning and Q-Learning FOCUS Reinforcement Learning and Very Basic Q-Learning PDF Day-116-Reinforcement-Learning-and-Q-Learning-Introduction.pdf	15 PAGES
DAY 117 PART 1	Scikit-learn Pipelines and Kaggle Workflow FOCUS Practical End-to-End Machine Learning Workflow PDF Day-117-Part-1-Scikit-learn-Pipelines-and-Kaggle-Workflow.pdf	19 PAGES
DAY 117 PART 2	MLflow Fundamentals FOCUS MLflow Fundamentals and Experiment Tracking PDF Day-117-Part-2-Mlflow.pdf	17 PAGES
DAY 117 PART 3	MLflow Experiments FOCUS Day 117 Part-3 — MLflow Practical Notes for Beginners PDF Day-117-Part-3-Mlflow-Experiments.pdf	19 PAGES
DAY 117 PART 4	MLflow Hands-On Project FOCUS Day 118 Hands-On Exercise — 8 Deliberately Different MLflow Runs PDF Day-117-Part-4-Project.pdf	16 PAGES
DAY 118	FastAPI Fundamentals FOCUS REST APIs with FastAPI PDF Day-118-FastAPI-Fundamentals.pdf	14 PAGES
DAY 119	Weekly Revision: ML Foundations FOCUS Day 119 — Weekly Revision: Unsupervised ML, RL, Pipelines, MLflow and FastAPI PDF Day-119-Weekly-Revision.pdf	27 PAGES
MEMORY LINE Connect actions and rewards to repeatable ML workflows, track experiments deliberately, and expose results through an API.		

SECTION 02 / DAYS 120-126

Projects, HTTP, REST, and API testing

Apply the earlier concepts in a two-part project, then build HTTP, REST, Postman, and API-testing foundations.

DAY 120	ML Model and FastAPI Mini-Project FOCUS Day 120 — Final Beginner Python, Data Science and Machine Learning Mini Project PDF Day-120-ML-Model-FastAPI-Mini-Project.pdf	29 PAGES
DAY 120 PART 2	Final Mini-Project, Part 2 FOCUS Day 120 Part-2 — Final Beginner Python, Data Science and Machine Learning Mini Project PDF Day-120-Part-2-Project.pdf	41 PAGES
DAY 121	HTTP Fundamentals FOCUS HTTP, Client, Server, Request, and Response PDF Day-121-HTTP-Fundamentals.pdf	14 PAGES
DAY 122	REST and HTTP Methods FOCUS REST, GET, POST, PUT, and DELETE PDF Day-122-REST-and-HTTP-Methods.pdf	17 PAGES
DAY 123	Headers, Parameters, JSON, and Status Codes FOCUS Headers, Path Parameters, Query Parameters, JSON, and Status Codes PDF Day-123-Headers-Parameters-JSON-and-Status-Codes.pdf	22 PAGES
DAY 124	Postman Basics FOCUS Sending API Requests Using Postman PDF Day-124-Postman-Basics.pdf	19 PAGES
DAY 125	API Testing, Keys, and Authentication FOCUS API Testing, Authentication, and API Keys PDF Day-125-API-Testing-API-Keys-and-Authentication-Basics.pdf	22 PAGES
DAY 126	Weekly Revision: HTTP and API Testing FOCUS Weekly Revision — HTTP, REST, Postman and API Testing PDF Day-126-Weekly-Revision.pdf	17 PAGES

MEMORY LINE

Trace each request from client to server, choose the correct HTTP method, inspect the response, and test authentication safely.

QUICK LOCATOR

Find the right note fast

Use this map when you know the subject you want to revisit but not the note that covers it.

Want to practice...	Core concepts	Go to
Reinforcement learning	agent, environment, reward, Q-learning	Day 116
Scikit-learn workflow	pipelines, preprocessing, Kaggle workflow	Day 117 / P1
MLflow fundamentals	runs, parameters, metrics, tracking	Day 117 / P2
MLflow experiments	multiple runs, artifacts, autologging	Day 117 / P3-4
FastAPI fundamentals	requests, endpoints, JSON responses	Day 118
ML revision	unsupervised ML, RL, pipelines, MLflow	Day 119
Model API project	model training, prediction, FastAPI	Day 120 / 2 PDFs
HTTP fundamentals	client, server, request, response	Day 121
REST methods	GET, POST, PUT, DELETE, CRUD	Day 122
Request details	headers, parameters, JSON, status codes	Day 123
Postman and API testing	manual requests, keys, authentication	Days 124-125
Weekly consolidation	HTTP, REST, Postman, API testing	Day 126

COMPLETION CHECK

Understand	Explain the concept and predict the output before running code.
Build	Write the exercise using meaningful names and clean structure.
Test	Try normal, boundary, missing, and invalid inputs where relevant.
Reflect	State one mistake to avoid and one real use for the pattern.
