DAY RANGES

COLLECTION GROUPS

1

DAYS 08-09

Day 8 — Complete Supervised ML Lifecycle | Day 9 — Model Selection, Metrics, Thresholds, Calibration, and Error Analysis

2

DAYS 10-12

Day 10 — Tree-Based Models for Structured Finance Data | Day 11 — Feature Engineering, Anomaly Detection, Explainability & Model Risk | Day 12 — Responsible AI, Experimentation, and Decision-Centered Evaluation

3

DAYS 13-14

Day 13 DSA Track — Heap / Priority Queue | Day 14 — Classical ML Consolidation & Model Defense

4

DAYS 64-66

Day 64 — Google Cloud Industry Capstone | Day 65 — AWS Industry Capstone | Day 66 — Multi-Cloud Industry Capstone

DAYS 08-14

Days 08-14

Seven generated PDFs listed in day order with source-derived focus headings and actual page counts.

DAY 08	Day 8 — Complete Supervised ML Lifecycle FOCUS Beginner-friendly summary; 1. Start with the Business Decision, Not the Algorithm; Business objective PDF Day-8-applied-ml-lifecycle-data-preparation-and-leakage-control-linked-list.pdf	85 PAGES
DAY 09	Day 9 — Model Selection, Metrics, Thresholds, Calibration, and Error Analysis FOCUS Beginner-friendly summary; 1. How to choose the main alternatives; 2. Regression: start with the decision PDF Day-9-regression-classification-metrics-thresholds-and-calibration-binary-search.pdf	93 PAGES
DAY 10	Day 10 — Tree-Based Models for Structured Finance Data FOCUS Beginner-friendly summary; 1. Concise model comparison; 2. Production ML workflow PDF Day-10-decision-trees-random-forests-gradient-boosting-and-xgboost-concepts-recursion.pdf	62 PAGES
DAY 11	Day 11 — Feature Engineering, Anomaly Detection, Explainability & Model Risk FOCUS Beginner-friendly summary; 1. Finance feature engineering; Main feature families PDF Day-11-feature-engineering-anomaly-detection-imbalance-explainability-and-robust-error-analysis-bfs.pdf	75 PAGES
DAY 12	Day 12 — Responsible AI, Experimentation, and Decision-Centered Evaluation FOCUS Beginner-friendly summary; 1. End-to-end mental model; 2. Offline evaluation beyond one score PDF Day-12-ml-evaluation-a-b-testing-bias-fairness-and-business-decisioning-dfs.pdf	73 PAGES
DAY 13	Day 13 DSA Track — Heap / Priority Queue FOCUS 1. Beginner-Friendly Summary; 2. Heap vs Priority Queue; 3. Heap Structure PDF Day-13-weekend-poc-2-explainable-finance-risk-or-anomaly-model-heap.pdf	52 PAGES
DAY 14	Day 14 — Classical ML Consolidation & Model Defense FOCUS Revision summary; Priority table; Part 1 — 25-question closed-book quiz PDF Day-14-week-2-revision-ml-case-study-and-model-review-sorting.pdf	36 PAGES

DAYS 64-66

Days 64-66

Three industry capstone PDFs listed with source-derived focus headings and actual page counts.

DAY 64	Day 64 — Google Cloud Industry Capstone FOCUS AI-Powered Finance Forecasting and Variance Intelligence Platform; 1. Executive Project Summary; Key architecture principle; 2. Business Problem and Executive Context; Current workflow PDF Day-64-FinanceForecasting.pdf	65 PAGES
DAY 65	Day 65 — AWS Industry Capstone FOCUS Secure Intelligent Document Processing and Risk Decision Platform; 1. Business Discovery; Current situation; Existing workflow; Business problems PDF Day-65-Intelligent-Document-Processing.pdf	63 PAGES
DAY 66	Day 66 — Multi-Cloud Industry Capstone FOCUS Modernize a Global Enterprise AI Platform Across Google Cloud and AWS; PART A — Business and Organizational Problem; 1. How the fragmentation happened; 2. What goes wrong; Duplicated teams PDF Day-66-Multi-Cloud.pdf	57 PAGES

Find the right note fast

Titles and section labels below are copied from the source headings.

SOURCE NOTE	SELECTED SOURCE SECTIONS	GO TO
Day 8 — Complete Supervised ML Lifecycle	Beginner-friendly summary; 1. Start with the Business Decision, Not the Algorithm; Business objective	Day 8
Day 9 — Model Selection, Metrics, Thresholds, Calibration, and Error Analysis	Beginner-friendly summary; 1. How to choose the main alternatives; 2. Regression: start with the decision	Day 9
Day 10 — Tree-Based Models for Structured Finance Data	Beginner-friendly summary; 1. Concise model comparison; 2. Production ML workflow	Day 10
Day 11 — Feature Engineering, Anomaly Detection, Explainability & Model Risk	Beginner-friendly summary; 1. Finance feature engineering; Main feature families	Day 11
Day 12 — Responsible AI, Experimentation, and Decision-Centered Evaluation	Beginner-friendly summary; 1. End-to-end mental model; 2. Offline evaluation beyond one score	Day 12
Day 13 DSA Track — Heap / Priority Queue	1. Beginner-Friendly Summary; 2. Heap vs Priority Queue; 3. Heap Structure	Day 13
Day 14 — Classical ML Consolidation & Model Defense	Revision summary; Priority table; Part 1 — 25-question closed-book quiz	Day 14
Day 64 — Google Cloud Industry Capstone	AI-Powered Finance Forecasting and Variance Intelligence Platform; 1. Executive Project Summary; Key architecture principle	Day 64
Day 65 — AWS Industry Capstone	Secure Intelligent Document Processing and Risk Decision Platform; 1. Business Discovery; Current situation	Day 65
Day 66 — Multi-Cloud Industry Capstone	Modernize a Global Enterprise AI Platform Across Google Cloud and AWS; PART A — Business and Organizational Problem; 1. How the fragmentation happened	Day 66

COLLECTION SUMMARY

10 note PDFs | 661 note pages | 1,998 fenced code/text blocks | 78 Markdown tables | 121 typeset math expressions | 0 Mermaid blocks
